

Prompt jeg sendte for at siden skulle lastes ned med en checkbox allerede markert

in react i want an object checked out and another not when loading up the page and without creating two seperate checkboxes

This is my code: export default function ShoppingItem({id, title, number, setShoppingList}){

```
function handleNumberChange(e){
  const value = e.target.value
  setShoppingList(prev => prev.map(item => item.id === id ? {
}

return (
  <article className="products">
    <input type="checkbox"/>
    <p>{title}</p>
    <input className="total-right" type="number" value={numb
  </article>
)
```

} This one is called ShoppingItem.jsx

Resultat:

Js

 Kopier

```
const [shoppingList, setShoppingList] = useState([
  { id: 1, title: "Milk", number: 1, checked: true },
  { id: 2, title: "Bread", number: 2, checked: false }
]);
```

```
function handleCheckboxChange(e) {
  const value = e.target.checked;
  setShoppingList(prev =>
    prev.map(item =>
      item.id === id ? { ...item, checked: value } : item
    )
  );
}
```
